

YellowScan

YellowScan Access.

Access the power of LiDAR, without the commitment.

Deploy high-performance LiDAR on your projects, exactly when you need it, without upfront investment. With YellowScan Access, you get what you need when you need it.

What you get.

- Access to YellowScan LiDAR systems on demand
- Flexible rental durations — rent by the day, week, or month
- Ready-to-deploy solutions
- Expert support when needed

Available systems.

One platform, four LiDAR systems — topographic and bathymetric — configured for your project.

Topographic		Bathymetric	
 Mapper Ultra. Fixed FOV Weight-to-performance Focused data collection	 Surveyor Ultra. Flexible scanner with 360° FOV High vegetation penetration Fly & Drive ready	 Voyager. Extreme point density Up to 32 echoes Multi-platform	 Navigator. Topography & water mapping Easy to use and process Safe operational range

What's included.

Hardware	Software	Services	Options
Choose the LiDAR solution that best suits your mission. ■ YellowScan Surveyor Ultra ■ YellowScan Mapper Ultra ■ YellowScan Voyager ■ YellowScan Navigator Accessories ■ Camera module 61MP	Take advantage of the latest software updates. ■ CloudStation Pro ■ Applanix or SBG	From delivery to returns, everything is included. ■ Delivery & Return (FR & DE) ■ Online training ■ Support ■ Assurance	For a light-hearted mapping mission. ■ EOMap (Navigator only) ■ Face-to-face training (2 days) ■ Flex annulation

How it works.

1

Tell us about your project

Scope, location, timeline

2

We configure your solution

Sensor + integration + support

3

You deploy in the field

Fully operational, fast

4

You deliver your project

With YellowScan performance

More than rental. A complete LiDAR experience.

- Industry-leading LiDAR performance
- Proven reliability in the field
- Compatible with your UAV ecosystem
- Access to YellowScan expertise

Perfect for.

Surveyors handling peak workloads

Companies entering LiDAR for the first time

Teams testing before investing

Projects with tight deadlines

Start your next LiDAR project with confidence.
